...YOU CAN'T BUY A BETTER "FLAT" ROOF!

If it's a "flat roof" . . . you can't do better than to specify a *cold-applied* Flintkote Built-up Roof.

Why? Because Flintkote Static† Asphalt, the heart of the Cold Process System, is bitumen in its most modern form . . . a stabilized, mineral-colloid type emulsion. This means:

Flintkote Static Asphalt will not flow under heat nor crack at low temperatures . . . craze, alligator or carbonize under exposure. It outlasts any other known form of bituminous coating.

Flintkote Cold Process Built-up Roofs are easy and safe to apply. They go on *cold*. No special heating equipment necessary. Easy application means fast application . . . and fast application lowers roofing costs.

Flintkote Cold Process Built-up Roofs are equally adaptable for new construction, re-roofing, renovation or maintenance. Static Asphalt, the top coating for Flintkote Cold Process Built-up Roofs, is non-inflammable in liquid state; will not support combustion in final form.

For complete specifications and application data see Sweet's, Architectural File, or write THE FLINTKOTE COMPANY, Building Materials Div., 30 Rockefeller Plaza, New York 20, N. Y. Offices in Principal Cities.

●

FLINTKOTE MAKES A COMPLETE LINE OF BUILDING MATERIALS . . . Asbestos-Cement Shingles and Siding • Asphalt Coatings • Asphalt Shingles and Sidings • Building Papers • Decorative Insulation Board • Fiberglas* Insulating Wool • Hot and Cold Built-Up Roofings • Insulated Sidings • Roll Roofings and Sidings • Structural Insulation Board.

(*TM Reg. U. S. Pat. Off. Mfd. by Owens-Corning Fiberglas Corp.) †Trademark

SPRAY APPLICATION BRINGS NEW ADVANTAGES TO COLD-PROCESS ROOFING . . .

Two specially developed Flintkote products . . . Nu-Static† and Fibrex II†. . . make it possible to roof quicker, better and at lower cost with *Spray Application.*

Nu-Static and Fibrex II used with recommended spray equipment gives you cold-process application, *plus* these important advantages:

1. *Reduction in roofing cost of from 25 to 50%, because Spray Application speeds up work.*
2. *Improved finished jobs, because of more uniform coating to required thicknesses.*
3. *Tends to eliminate high and low areas, streaks and bare spots which often accompany squeegee and brush application.*
4. *Areas difficult to cover by old methods are easy to reach with Spray Application.*
5. *Waterproofing of parapets and application of protective coatings to metal roofs are quicker and easier by spray.*
6. *Impact of the spray gives a spray-applied roof a tighter film.*

FLINTKOTE

FLINTKOTE BUILDING MATERIALS

the extra years of service cost no more!

ARCHITECTURAL RECORD (Vol. 102, No. 1, July, 1947) is published monthly by F. W. Dodge Corp., 10 Ferry Street, Concord, N. H., with editorial and executive offices at 119 W. 40th St., New York 18, N. Y. $4.50 per year; Foreign, $6.50.

Entered as second-class matter at the Post Office, Concord, N. H., under the Act of March 3, 1879.
